

Project Coordinator Internship - AI Data Services – ConsultBae

About ConsultBae

ConsultBae operates across two core verticals:

- **Recruitment Services**
- **AI Data Services**

This internship is for the **AI Data Services vertical**, where we work with global companies to provide them high-quality training data so that they can build and train **AI and Large Language Models (LLMs)**. We don't train or built models for now ourself.

Our work includes **data collection, data annotation, and data labeling** across formats such as:

- Images
- Videos
- Audio / speech
- Text

We have executed projects across **100+ countries** using a **freelancer and crowd-based execution model**.

Role Overview (Very Important to Read)

This is a **purely NON-TECHNICAL** role.

You are **not expected to code**, train models, or work on AI/ML algorithms.

Your job is to **execute non-technical AI data projects** such as **data collection and data annotation** by managing people and processes.

Think of this role as **project execution and coordination**, not technology development.

What You Will Actually Do

As a **Project Coordinator Intern**, your responsibility is to **get work done through freelancers**.

You will usually **not collect or annotate data yourself**.

Instead, you will:

- Onboard freelancers
- Negotiate Pricing
- Explain tasks clearly
- Assign work
- Track daily progress
- Ensure timely and correct delivery
- Making Payments Responsibly

This is a **hands-on, execution-focused role**.

Your Responsibilities (Step-by-Step)

1. Understand the Project Completely

You will first understand the project end-to-end, including:

- What data needs to be collected or annotated
- Quality guidelines (what is acceptable vs unacceptable)
- Collection and submission process
- Daily targets and timelines

You must be confident enough to explain the project clearly to others.

2. Freelancer Onboarding & Coordination

Most projects require onboarding freelancers across **multiple countries and categories**.

Your work includes:

- Finding freelancers using different platforms and methods
- Explaining the project clearly and accurately
- Ensuring they understand quality expectations
- Negotiating rates when required
- Getting them ready to start work quickly

Freelancer onboarding is a **critical part of this role**.

3. Task Assignment & Daily Execution

Once freelancers are onboarded:

- Assign tasks country-wise and category-wise
- Track daily progress and outputs
- Follow up to ensure targets are met
- Resolve delays or execution issues

You are responsible for **daily execution and delivery**.

4. Quality & Timely Delivery & Payments

You will:

- Review submissions for guideline adherence
 - Help freelancers fix errors
 - Ensure timely and correct submission of data
 - Escalate issues when required
 - Payments needs to be done correctly based on Client Accepted submissions.
-

Types of Non-Technical Projects You May Work On

- Image data collection
- Video data collection
- Audio / speech data collection
- Text data collection
- Data annotation and labeling projects

These are **execution-based, non-technical projects**, not software or AI development tasks.

Working Hours & Time Zone Expectations

- Standard working hours: **10:00 AM – 7:00 PM (IST)**
- Since projects are global, **time-zone coordination may be required**

Depending on the project:

- You may work with U.S./U.K or other international freelancers
- Your working hours may shift to **later in the day or night**
- Example schedules may include **3:00 PM – 1:00 AM** or **6:00 PM – 3:00 AM**

This flexibility is **project-dependent**.

What This Internship Is (And Is Not)

This internship IS:

- Non-technical
- Execution-driven
- People-management focused
- Fast-paced and target-oriented
- Real work on live AI data projects

This internship is NOT:

- A coding role
 - A machine learning or data science role
 - A research or theory-based internship
 - A passive or observation-only role
-

Who Should Apply

This role is suitable if you:

- Are comfortable speaking with people
- Can follow up consistently
- Can manage multiple tasks and deadlines
- Take ownership of execution and results

If you are looking for a **technical AI / ML internship**, this role may **not** be the right fit.

Final Note

This internship provides **real-world exposure to how global AI data projects are executed**, with strong learning in operations, coordination, and delivery.

Moreover, If you perform well in the internship, there can be increment in stipend in 3 months and full time conversion post 6 months.

Please Note -

1. We are **not** looking for candidates who are aiming to build a career in tech, coding, or software development.
 2. We are **not** considering individuals who are currently enrolled in college or engaged in any part-time work, internships, or exam preparation.
 3. This role needs purely 9 hours of work based on the project timings.
 4. We are seeking candidates who are **fully available**, with no other professional, academic, or personal commitments.
