EDUCATION

Mumbai university

Dwarkadas J. Sanghvi
College of Engineering

August 2024 to June
2028

TECHNICAL SKILLS

- Coding
- Java
- Webdevelopment
- Python
- Basics of Devops

QUALITIES

- Teamwork
- Leadership
- Communication
- Gym
- Time management
- Problem solving

PROFILE

Highly motivated and passionate web and software developer with a strong foundation in front-end and back-end technologies. Proficient in multiple programming languages including **Python, Java, JavaScript, HTML, CSS, and C**, enabling the development of dynamic and efficient applications. Adept at problem-solving and eager to contribute to innovative projects by leveraging a diverse technical skill set. Committed to continuous learning and delivering high-quality code in collaborative environments.

WORK EXPERIENCE

- Completed hands-on web development projects during college, gaining a solid understanding of HTML, CSS, and JavaScript through practical implementation.
- Worked on responsive design and UX-focused applications as part of academic and internship-based assignments.
- Built proficiency in JavaScript and Python by developing real-time applications and completing lab-based tasks.
- Contributed to collaborative team projects mimicking real-world development scenarios, enhancing skills in project management and effective communication.
- Took part in elective internships and workshops exploring modern frameworks like React.js and Node.js, fostering adaptability

Projects

1.NETFLIX CLONE:

Developed a responsive front-end Netflix clone focusing on UI/UX design. Implemented carousels, movie sections, and login/signup forms. Enhanced skills in layout design, responsiveness, and scripting.

2.SPOTIFY CLONE:

Built a user-friendly music player interface inspired by Spotify. Included custom audio player, playlists, and interactive controls. Focused on DOM manipulation and audio integration. Improved front-end development and media handling skills.

3.CAFÉ MANAGEMENT

Created a command-line cafe management tool in Python. Managed menu items, order processing, billing, and inventory. Used functions, file storage, and input handling. Simulated real-world operations through structured programming. Strengthened understanding of Python and data structures.
